

WEB DANDY

Doing the right thing. Doing it brilliantly.

At Web Dandy, we're proud of what we do. Not only are we a thriving UK based web design agency that produces professional, high quality, accessible **website design to world class standards**, but we're also an agency that *cares*.

Founded in 2004, we've always had a reputation for innovation and excellence. We specialise in **accessibility** – producing websites so that people with disabilities can use them and benefit from everything the internet has to offer.

Our team works with a passion to provide you with the website you've always dreamed of: a **bespoke, eye-catching and affordable website** (from just £279) that serves as a stunning first point of contact for your business. We don't use templates; all websites are custom designed for your business in a style that's right for you, so you can be sure you have a 'one-of-a-kind' design.

We provide a complete range of IT solutions:

- accessible websites
- graphic design
- banner & stand design
- feature-rich content management
- eCommerce shopping carts
- logo & stationery design
- accessibility audits
- search engine optimisation (SEO)

In fact, our knowledge of on-page and off-page SEO, pay per click, and article placement is unmatched. And you can relax, knowing you are totally covered, because **our support plans cover everything** from regular updating of site content to data management. That means complete peace of mind.

All this, as well as putting accessibility at the very core of our company ethos and design process, is why we're at the top of a fiercely competitive industry. **Our accessible websites inform, perform and inspire.** That's why, every day, businesses everywhere are turning to us to help them grow on the internet and become as great as they can be.

Now it's your turn.
